Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. The drawings are objected to because there are no descriptive labels for elements 12, 14 of figure 1 and elements 22 and 24 of figure 3. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 1 and 15 are objected to because of the following informalities:

The recitation of "media control circuit" recited in claim 1, line 7 is suggested to change to – medium access control circuit --. Such suggestion is for consistency with the same limitation recited in the preamble.

The recitation of "when" recited in claim 15, line 1 is suggested to change to – wherein --.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of "the error information" recited in claim 14, line 4 lacks antecedent basis.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2611

6. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art figures 1 and 2 and paragraphs [0004] to [0008] of the instant application in view of Butler et al (US 6,741,612).

The admitted prior art figures 1 and 2 and paragraphs [0004] to [0008] of the instant application teaches all subject matter claimed except for combining the functions of the two pins CRS_DV and RX_ER together to reduce the number of pins of the Medium Interface. However, Butler et al teaches combining the functions of the pins together if the state is known. See columns 2, line 35-65; column 3, lines 8-33; and column 5, lines 31-49. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of the admitted prior art by using the combining functions as taught by Butler et al so that the number pins can be reduced.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Graham et al (US 6,678,321), Lo et al (US 7,042,893), and Lo (US 7,065,075) are cited because they are pertinent to communications between MAC and PHY.
